

## PRESCRIBE SOLUTIONS

**PRESCRIBE** is a Document Creation & Output Solution that allows you to utilize a Kyocera printer or MFP in a whole new way. **PRESCRIBE** offers your business a flexible, on-demand printing solution for forms, letterhead and similar corporate documents. **PRESCRIBE** expands the boundaries of your output device. And the best part? **PRESCRIBE** is a value-add solution that comes free of charge\* with Kyocera printers and MFPs. If you haven't already implemented a **PRESCRIBE** Solution, what are you waiting for?

### Top Ten Reasons to Implement a PRESCRIBE Solution for Your Business

#### 1. Forms Creation

Eliminate the need for costly preprinted forms with PRESCRIBE FORMS CREATION. Your business can create and utilize variable data forms to be stored on most Kyocera printers and MFPs. When needed, they can be printed on-demand, without the need for special stock or media. Forms expense will be drastically reduced with this workflow.

#### 2. Forms Modification

Implementing a PRESCRIBE FORMS SOLUTION greatly improves your turnaround when new forms are required and eliminates the waste from destroying obsolete forms and reprinting new ones. With PRESCRIBE, the electronic form you've created can be modified at any time to accommodate typical changes such as business addresses and telephone numbers, corporate logos and images, and critical data that must be added.

#### 3. Multi-Part Forms

With PRESCRIBE, Kyocera printers and MFPs can output multi-part forms using media designed for laser devices. These forms can be created to your specification, and then printed on demand, to eliminate the need for special 'tractor-feed' media, or the occurrence of printing wasted pages.

#### 4. Specify Job Output

Unlike some software solutions, PRESCRIBE is independent of any specific device driver, allowing for greater flexibility, particularly in host printing environments like AS400 and UNIX. A PRESCRIBE Solution can be integrated into these complex print environments, allowing your business to take advantage of the diverse paper handling and finishing features of your Kyocera printer or MFP.

#### 5. PCL Font Download

Businesses using custom fonts do so to ensure proprietary documents and materials cannot be compromised. With PRESCRIBE, custom fonts can be sent and stored to any Kyocera printer or MFP; when needed, they are printed quickly and efficiently, eliminating the need to download special fonts time and time again.

#### 6. Secure Signatures

In a fast-paced environment, authorization signatures are often automated for quick turnaround of time-sensitive documents. Kyocera's PRESCRIBE Solution can integrate these automated signatures within your business documents as part of the imaging process; and for added value, these signatures can be stored on a compact flash card, making them both portable and secure to prevent misuse, a concern for any business.

#### 7. Letterhead

Delivering a professional message with your business correspondence is heavily dependent on your letterhead. Kyocera's PRESCRIBE Solution allows for the electronic creation and on-demand output of documents that convey your message, eliminating the need and expense of preprinted media.

#### 8. Barcode

Barcode printing is necessary for many businesses for accuracy and data fulfillment. With a PRESCRIBE Solution and a Kyocera printer or MFP, barcode fonts can be stored at the device for an incredibly cost-effective workflow; or the PCL Barcode Flash solution can be added to automatically create barcodes as part of your print job.

#### 9. Gray or Green Bar Output

Legacy data applications are often trapped into using older technology, like a 'tractor-fed' dot matrix printer. PRESCRIBE will allow your business to use the latest in imaging technology, incorporating a Kyocera printer or MFP into your business application. The result is more productive output, eliminating the need for special paper, and the added bonus that the features and capabilities a Kyocera device will provide.

#### 10. Raw Data

For the host-printing environment, where applications use data streams and documents are printed without the use of a typical print driver, managing and controlling the output can be a difficult task. PRESCRIBE allows businesses to improve control over page formatting, so your data reporting is precise and correct when printed.

\* PRESCRIBE command language/PDL is standard on most Kyocera Printers and MFPs. Technical Training and Professional Service support fees may apply.
